

J&J GLOBAL PUBLIC HEALTH:

Advancing Pediatric HIV Collaborative

The New Horizons: Advancing Pediatric HIV collaborative was formed by the Janssen Pharmaceutical Companies of Johnson & Johnson with expert input from many stakeholders involved in pediatric HIV care, treatment and prevention. The collaborative aims to address the need for lifesaving 2nd and 3rd line antiretroviral drugs in sub-Saharan Africa and least-developed countries and to strengthen the public health approach to care and treatment for adolescents and children living with HIV.

Vision, Mission, and Goals

In support of Johnson & Johnson's Health for Humanity 2020 commitment to deliver innovative health care access and training programs that impact a billion lives in underserved areas:

Our Vision: A world in which young people living with HIV lead full and healthy lives, achieve their aspirations and reach their potential.

Contribute to UNAIDS 90-90-90 target

Ensure that global HIV response addresses the critical unmet needs of children & adolescents

Promote treatment equity between adults & children

Link 5,000 pediatric patients to care & access to J&J treatment by 2020
